

When and where are we collecting data? What do we need?

This tool is meant to be an example of the type of chart you can put in front of students to help keep track of data collection locations, tools, and data by group. You might want to make one of these each day you do data collection. Alternatively, you could have students fill this class chart in the day before they collect data.

Data collection date	Group # or name	Where is data collection taking place? (field, garden, home)	What data are we collecting?	What tools do we need?
