

Garden Wondering Walk

- A. Take a walk in the garden by yourself or with a partner. Choose a place to sit so that you can look closely at what is happening in the garden. Who do you see in the garden? And what are they doing? Look up, down, and all around. Imagine the garden from the view of another animal, plant, soil or water. Use a hand lens if you like.
- B. Write down, draw, or sketch interesting things you observe about more-than-humans (soil, plants, insects, rocks, water, birds)
- C. In the other box, write down some things you are wondering about. We will use these wonderings and observations to help us decide what we should do in the garden next.

Draw or write what you notice happening in the garden that is interesting to you.

Do you notice any relationships that are involved? (For example, you can use arrows to show relationships with other plants, with an animal, with soil, with an insect, with water?)

Are there other things you noticed on your garden walk that you observed and wondered about? Draw or write about those here:

A large empty rectangular box for drawing or writing.
